Guided outdoor education

Our programs in teambuilding, leadership and environmental education have been designed to assist student achievement. They meet the Department of Education academic expectations in the areas of Science, English, Physical Education and Health. For 2nd -12th grades, they were developed from a broad consensus of what school administrators, parents, classroom teachers, business and community leaders and academics believe students should learn.

Maximize your student's learning experience by incorporating these areas of achievement into your lesson plans as you prepare for your visit to Sweetdale Camp. Use these educational achievement areas as tools to:

- build self-confidence and self esteem,
- galvanize a class together,
- share adventurous experiences,
- create a fun/relaxed atmosphere for more enjoyable working conditions,
- have a platform for easier problem-solving in the future.

The facilitation staff of Sweetdale Camp for Outdoor Education will strive to work with you to make your day with us a fun-filled learning experience to be remembered for a lifetime.
